

Super Spy Adventure - Day 10

Who's print is it?

Now that you know all about fingerprints, let's learn to identify them! Scientists identify fingerprints using the small structures in the finger patterns.

Take your own fingerprints, using the handout below to place your fingerprints on the hand, and label it. Then study its characteristics, using the chart to recognize patterns.

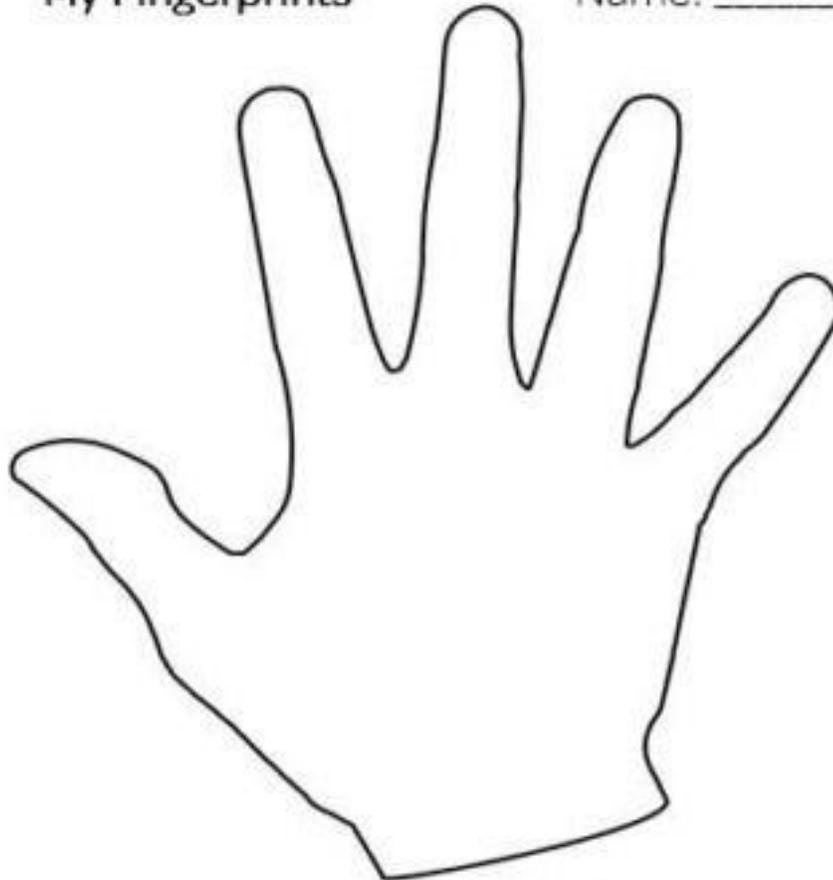

Now take the fingerprints of everyone in your house, place them in your book label them and study them.

Shhhh!

Don't let them know you did it!

My Fingerprints

Name: _____

Right Hand

Arch

Whorl

Double Loops

Simple Loop

Instructions:

1. Pencil a large square on a piece of scappaper
2. Rub your finger on the graphite
3. Place a piece of clear tape on your finger and stick it to the matching finger.
